Featured Projects

ReverseData App : Full Stack E-commerce App: Technologies: MEAN Stack, Salesforce
A data management app that allows Sales Engineers business data using selection of charts. The data is generated in Heroku app and pushed to Salesforce via standard APIs.
Live Demo: https://reversedata.herokuapp.com/#/   Repo: https://github.com/ramsandhya/ReverseData.

Coffee Store App *: Full Stack E-commerce App: Technologies: Node.js, Angular.js, MongoDB, Express.js*
An e-commerce app where developed with data security and privacy using bcrypt for encryption and secured payment processing with stripe. It has seamless integration in frontend and backend hosted on Heroku platform.
Live Demo: https://mycoffeestore.herokuapp.com   Repo: https://github.com/ramsandhya/Coffee-App.

Sportakus : Sports Map/Ticket Aggregator: Technologies: HTML5, CSS3, JavaScript, Angular.js
Sports Fans app developed with static json files using Sportradar APIs and Ticketmaster APIs.
Live Demo: http://mysportakus.surge.sh/   Repo: https://github.com/ramsandhya/Coffee-App

MOVIEPlex : Movie App: Technologies: HTML5, CSS3, JavaScript, JQuery, AJAX
MOVIE Plex lets you browse real time movies info using IMDB Movie APIs and buy tickets. Multiple callback functions are used to cache movies data and tracking how far a user has navigated within carousel.
Live Demo: http://movieplexsr.surge.sh/   Repo: https://github.com/ramsandhya/MOVIEPlex

Superhero Canvas Game: Technologies: HTML5, CSS3, JavaScript, JQuery
Superhero game uses the math.random to create coordinates and tracks the highest score in one session.
Live Demo: http://canvasgamesr.surge.sh/canvasgame.html   Repo: https://goo.gl/cnvJXQ

Google weather map: Technologies: HTML5, CSS3, JavaScript, JQuery, AngularJS
Weather forecast app lists the current weather for selected cities. It forecasts the 5-day weather for a particular city. The routing makes the app single page application.
Live Demo: http://my-weather-map.surge.sh   Repo: https://github.com/ramsandhya/Weather-App

Blackjack: Technologies: HTML5, CSS3, JavaScript, JQuery
Blackjack game typically has used animate.css and jQuery to animate the cards and the game.
Live Demo: http://blackjacksr.surge.sh/blackjack-sr.html   Repo: https://github.com/ramsandhya/Blackjack

Employee Community: Technologies: Bootstrap, Salesforce Community, Lightning Components, Javascript
I developed lightning components with Apex Controllers which were hosted on Salesforce1 Lightning App and Salesforce Community Napili Template. Its inter component communication used event driven programming.
